Frequently Asked Questions

How long does laser hair removal take?

Everyone is different, but it usually takes 10-12 treatments to get the best results. Memberships last 18-24 months in order to make sure you get enough treatments. You will be treated about once every 4-8 weeks, depending on the area.

Am I a good candidate for laser hair removal?

We can treat any skin type and color safely and effectively. We can treat all hair colors, but people with dark brown or black hair usually experience the best results. People with blonde, red, grey, and white hair can expect about 20 percent hair reduction.

We cannot treat clients using Accutane, under the age of 16, or who are pregnant.

Does laser hair removal work?

Yes! Most clients will see 70-90 percent permanent hair reduction. It works by targeting the pigmentation and blood supply of each hair follicle to destroy it, preventing future hair growth.

What type of laser does Simplicity use?

Simplicity is pleased to offer the best laser technologies on the market today. We use the Candela Gentle Max Pro and the Candela Nd:Yag.

Is laser hair removal painful?

Many clients compare laser hair removal to be snapped by a rubber band. Compared to a waxing treatment, it is very little discomfort. We use a Zimmer device to blow cool air on the skin, which helps minimize pain.

How does Simplicity's rewards program work?

For every friend you refer to Simplicity, you can earn awesome rewards. Refer a friend to a simple area, premium area, or three area membership and earn one free month on your membership. Refer a friend to a full body membership and earn two free months on your membership. There are no limits to how many free months you can earn, so tell your friends!
